

Job Title : Electrical Technician

Department : Technical

Report To : Electrical Supervisor

Job Purpose : To provide support to the electrical team to solve technical problems and incidents that can jeopardize the security of persons and the company's electrical and electronic installation and equipment.

MAIN RESPONSIBILITIES:

1. Perform upkeep, examination, diagnosis, and repairs for resident-commercial, and maritime electrical systems, apparatus, and installations.
2. Perform maintenance and repair of basic electrical systems, equipment, and installations on vessels, ashore-based marine equipment, and domestic facilities.
3. To keep records of equipment and their operating parameters, materials, spare parts inventory and all other relevant records;
4. Perform electrical and basic electronic circuit calculations, and control electrical tools and instruments.
5. To ensure safety of persons, equipment, and materials.

Required Skills and Experience

- City and Guilds, part I or equivalent in electrical/electronic engineering from a recognized institution.
- A Minimum of 2 to 5 years post-qualification work experience in a reputable electrical and electronic engineering organization.

Competencies

- To have excellent electrical/electronic colour code vision.
- Ability to carry out maintenance on motors, bearings, circuit breakers, contactors, switch gears, alternators, etc.,
- Ability to use a multimeter and other relevant tools and instruments.
- Troubleshooting skills – To find, diagnose, and repair problems.
- Critical thinking skills – Performing tests and using the results to diagnose problems and determine the best course of action to take.
- Customer service skills – Because electrical technicians deal with individuals and businesses daily, they should be comfortable working with customers.

How to apply

All CVs with covering letters should be sent to vltc.hr@vltcgh.com before June 22, 2024
